Bachelor’s Degree Program
Technical Management

Specialization: Global Supply Chain Management

ABOUT THIS SPECIALIZATION

DeVry University’s bachelor’s degree in Technical Management can help prepare you for the workplace with a solid business foundation. Our specialization in Global Supply Chain Management may give you the specific skills your chosen career demands.

Global supply chain management professionals are responsible for streamlining the flow of everything—from raw materials to information to finished products—that organizations need in order to make and deliver their products and services in order to satisfy their customers. Because supply chain management touches all aspects of every company’s daily operations—from cost minimization, risk mitigation, and environmentally conscious sourcing decisions—it has a major impact on profitability and competitive advantage. And it’s a rapidly growing field with a wide range of job opportunities, thanks to the increasing complexity of supply and distribution systems and the globalization of our economy.

DeVry University’s Global Supply Chain Management specialization equips you with a thorough understanding of all stages of the supply chain, the complexities of global markets, and the supply chain optimization technologies, concepts and processes used by world-class organizations.

Graduates of DeVry University’s Technical Management program with a specialization in Global Supply Chain Management might consider careers that include:

- Distribution Manager
- Logistician
- Procurement/Sourcing Manager
- Supply Chain Manager

Logistics—the function of supply chain management that handles product distribution within a company—is growing especially quickly; employment of logisticians is expected to grow 26 percent between now and 2020, faster than the average for all occupations,1 and logistician is No. 20 on the 2013 list of Best Business Jobs compiled by U.S. News & World Report.2

KNOWLEDGE AND SKILLS

STRATEGIC DECISION MAKING3 — Be able to analyze information and evaluate results to solve problems and choose the best solutions.

COMPLEX PROBLEM SOLVING3 — Understand how to identify complex problems and review related information to develop and evaluate options and implement solutions.

MULTI-LEVEL COMMUNICATIONS4 — Have the ability to convey information effectively, both horizontally and vertically within an organization.

CRITICAL THINKING3 — Know how to use logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions or approaches to problems.

SYSTEMS ANALYSIS3 — Understand ways to determine how a system should work and how changes in conditions, operations and the environment will affect outcomes.

MATHEMATICS3 — Understand arithmetic, algebra, geometry, calculus and statistics, along with their applications.
