All of these courses

3-4 of these courses

These electives are chosen through academic advising, from courses that are different from those used to meet any other graduation requirement. They may be selected from courses listed in the academic catalog, provided prerequisites are satisfied.

Note: DeVry's academic catalog, available via www.devry.edu/uscatalog, contains the most current and detailed program information, including graduation requirements.
DeVry University’s Bachelor’s degree in Management helps prepare you for the workplace with a solid business foundation. Our specialization in Project Management can further focus your studies and help equip you for the career you want to pursue.

Project management encompasses directing and coordinating ideas, resources and information from team members, as well as, outside resources. Those in project management help to initiate and facilitate all steps of a project from planning to project completion. In addition, project managers not only oversee how a project develops, but also manages the individuals that create what is needed for the project. You may manage a team of developers, builders, designers, manufacturers or other professionals in order to create final products that may range from software to buildings to consumer goods.

Project managers perform many tasks that keep projects moving on time and on budget. Project managers may be asked to set budgets, timelines and schedules, provide estimates, acquire outside resources, identify, analyze and evaluate project goals and deliverables.

Graduates of DeVry University’s Management program with a specialization in Project Management may consider careers including:

- Project Manager
- Project Quality Manager
- Project Team Leader
- Organizational Change Manager
- Procurement Manager
- Project Developer

According to the Project Management Institute, the number of project-oriented employees will grow by an estimated 8.2 million between 2006 and 2016.1
