ABOUT THIS DEGREE PROGRAM

The bachelor's degree in Management at DeVry University can help you develop the management skills needed to work in many business areas and industries, such as accounting, project management, entrepreneurship, marketing, and human resources. If you're currently employed, this can be a great way to further develop your management skills.

Our Management degree program is designed to prepare students to meet the challenges of a high-tech, global marketplace by bringing the real world into the classroom. Through experiential projects, you can develop the skills and business acumen needed in today's business world.

This program is designed to accommodate students with a wide range of experiences, including those with little or no prior college education or work experience. If you have prior work or educational experience, you may also want to consider our Technical Management degree program which is available with many of the same specializations.

Through our TechPath approach, we’ve put technology at the core of our programs in business, tech and health – including this program. Every TechPath class you take revolves around a unique learning rubric developed at DeVry. We call it People-Process-Data-Devices or P2D2. You’ll gain real skills in collaboration, be able to adapt to new structures, and be comfortable working with data and a wide spectrum of tech-forward tools. P2D2 is a key component of what makes TechPath a smart, new way of getting the knowledge you need to be ready to hit the ground running in the way successful companies work today.

Programs, course requirements and availability vary by location. Some courses may be available online only. All students enrolled in site-based programs will be required to take some coursework online and, for some programs and locations, a substantial portion of the program may be required to be completed online. DeVry’s academic catalog, available via devry.edu/catalog, contains the most current and detailed program information, including admission, progression and graduation requirements. Information contained herein is effective as of date of publishing.
DeVry University's bachelor's degree program in Management can help prepare you for the workplace with a solid business foundation. Our specialization in Human Resource Management can further focus your studies.

Human resource management focuses on an organization's most precious asset: the people who, individually and collectively, are responsible for its success. Human resource managers play an important role in helping to plan and direct hiring practices, employee benefits and relations programs, and training and development.

Our Human Resource Management specialization can help you learn about designing pay structures, developing employee policies, communicating employee benefits, selecting payroll systems and working with the executive team to develop hiring and employment goals.

Graduates of DeVry University's Management program with a specialization in Human Resource Management may consider careers including, but not limited to, the following:

- Administrative Assistant
- Administrative Services Manager
- Employee Benefits Specialist
- Employee Relations Manager
- Human Resource Generalist
- Human Resource Information Systems Specialist
- Management Analyst/Consultant
- Training and Development Manager

Employment in some occupations may require years of relevant experience.

ADMINISTRATION AND MANAGEMENT — Understand the fundamental management theories and traditional managerial responsibilities in formal and informal organizational structures, including planning, organizing, directing, controlling and staffing.

EMPLOYMENT LAW — Study federal and state laws as they affect the human resource function, including equal employment opportunity, employment agreements, wage and overtime payment, and other regulatory issues.

HUMAN RESOURCE INFORMATION SYSTEMS — Explore the technology options available for managing the human resource function.

STRATEGIC STAFFING — Recruit, select, train and retain employees to achieve organizational goals.

TRAINING AND DEVELOPMENT — Improve individual and corporate effectiveness through training needs analyses, implementation planning and outcomes assessment.

COMPENSATION AND BENEFITS — Use pay systems and benefit plans to achieve corporate goals. Learn about compensation design, analysis and evaluation in terms of both legally required and voluntary benefit options.

CONFLICT RESOLUTION — Handle complaints, settle disputes, resolve grievances and reach mutually acceptable compromises with others.

COMPLIANCE EVALUATION — Use relevant information and individual judgment to determine that events or processes comply with laws, regulations or standards.
