Bachelor’s Degree Program
TECHNICAL MANAGEMENT

ABOUT THIS DEGREE PROGRAM

For those with prior college education or professional experience, the bachelor's degree completion program in Technical Management at DeVry University can help you develop the management skills needed to work in many business areas and industries, such as accounting, project management, entrepreneurship, marketing, and human resources. With previously earned qualifying college credits, you may be able to earn your bachelor's degree in less time.

Our Technical Management degree program is designed to prepare students to meet the challenges of a high-tech, global marketplace by bringing the real world into the classroom. Through experiential projects, you can develop the skills and business acumen needed in today's business world.

If you have prior work or educational experience, you may also want to consider our Management degree program, which is available with many of the same specializations.

TECHNICAL SPECIALTY: MINIMUM 27 CREDIT HOURS

Included with the program are technical specialties and a general technical option as shown in the following program outline. Students who have not chosen an area of specialization may begin the program in “Undeclared” status; however, they must select a technical specialty by the time they have earned 30 semester-credit hours toward their degree. Available specialization are:

- Accounting
- Business Intelligence and Analytics
- Management
- Criminal Justice
- Finance
- Global Supply Chain Management
- Health Information Management
- Health Services Management
- Information Technology
- Project Management
- Sales and Marketing
- Small Business Management and Entrepreneurship

KNOWLEDGE AND SKILLS

ADMINISTRATION AND MANAGEMENT — Understand the business and management principles involved in strategic planning, resource allocation, production methods and coordination of people and resources.

CRITICAL THINKING — Use logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions or approaches to problems.

MATHEMATICAL REASONING — Use mathematical formulas to solve problems or project outcomes.

JUDGMENT AND DECISION-MAKING — Consider the relative costs and benefits of potential actions to choose the most appropriate one.
