Businesses large and small are the core of the American economy. Earning a bachelor's degree in Business Administration at DeVry University can help you develop the skills needed to work in many business areas and industries, such as accounting, project management, entrepreneurship, marketing, and human resources.

The Business Administration degree program is designed to prepare students to meet the challenges of a high-tech, global marketplace by bringing the real world into the classroom. Through experiential projects, you can develop the skills and business acumen needed in today's business world.

This program is designed to accommodate students with a wide range of experiences, including those with little or no prior college education or work experience. If you have prior work or educational experience, you may also want to consider our Technical Management or Management degree programs, which are available with many of the same specializations.

DID YOU KNOW?
DeVry University's Bachelor of Science in Business Administration program has achieved voluntary accreditation from the Accreditation Council for Business Schools and Programs (ACBSP) www.acbsp.org, demonstrating that it has met the standards of business education that promote teaching excellence.

Programs, course requirements and availability vary by location. Some courses may be available online only. All students enrolled in site-based programs will be required to take some coursework online and, for some programs and locations, a substantial portion of the program may be required to be completed online. DeVry's academic catalog, available via devry.edu/catalogs, contains the most current and detailed program information, including admission, progression and graduation requirements. Information contained herein is effective as of date of publishing.

Version 08/14/17

SPECIALIZATION: ACCOUNTING

KNOWLEDGE AND SKILLS

ADMINISTRATION AND MANAGEMENT — Understand the business and management principles involved in strategic planning, resource allocation, production methods and coordination of people and resources.

FINANCIAL ACCOUNTING — Understand financial foundations, including asset recognition and measurement; external reporting; accounting for income taxes, pensions and other post-retirement benefits; shareholders’ equity, share-based compensation and earnings per share; accounting changes and error correction; and statements of cash flow.

AUDITING — Examine the principles, practices and procedures used by public accountants for certifying corporate financial statements.

ACCOUNTING INFORMATION SYSTEMS — Learn to design, install, operate and manage an integrated, automated accounting system, including ledgers, transaction process cycles, application controls, information security requirements and business information systems integration.

FEDERAL INCOME TAXATION — Understand business models such as sole proprietorships and limited-partnerships, as well as the federal taxation concepts that apply to them, including income inclusions and exclusions, property transactions, capital gains and losses, and tax credits.

FINANCIAL ADVISING — Advise clients in areas such as the design of accounting or data processing systems, and long-range tax or estate planning.

CRITICAL THINKING — Use logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions or approaches to problems.

MATHEMATICAL REASONING — Use mathematical formulas to solve problems or project outcomes.

JUDGMENT AND DECISION-MAKING — Consider the relative costs and benefits of potential actions to choose the most appropriate one.
