ABOUT THIS DEGREE PROGRAM

The bachelor's degree in Management at DeVry University can help you develop the management skills needed to work in many business areas and industries, such as accounting, project management, entrepreneurship, marketing, and human resources. If you're currently employed, this can be a great way to further develop your management skills.

Our Management degree program is designed to prepare students to meet the challenges of a high-tech, global marketplace by bringing the real world into the classroom. Through experiential projects, you can develop the skills and business acumen needed in today's business world.

This program is designed to accommodate students with a wide range of experiences, including those with little or no prior college education or work experience. If you have prior work or educational experience, you may also want to consider our Technical Management degree program which is available with many of the same specializations.

Through our TechPath approach, we've put technology at the core of our programs in business, tech and health – including this program. Every TechPath class you take revolves around a unique learning rubric developed at DeVry. We call it People-Process-Data-Devices or P2D2. You’ll gain real skills in collaboration, be able to adapt to new structures, and be comfortable working with data and a wide spectrum of tech-forward tools. P2D2 is a key component of what makes TechPath a smart, new way of getting the knowledge you need to be ready to hit the ground running in the way successful companies work today.

Courses in blue are part of the DeVry Tech Path Programs, course requirements and availability vary by location. Some courses may be available online only. All students enrolled in site-based programs will be required to take some coursework online and, for some programs and locations, a substantial portion of the program may be required to be completed online. DeVry's academic catalog, available via devry.edu/catalogs, contains the most current and detailed program information, including admission, progression and graduation requirements. Information contained herein is effective as of date of publishing.

DeVry University's bachelor's degree program in Management can help prepare you for the workplace with a solid business foundation. Our specialization in Accounting can further focus your studies.

Our Accounting specialization curriculum will provide you with the knowledge of financial tools, tax codes and U.S. laws needed to navigate a wide range of business environments—from the private sector to government, to not-for-profit. You can also learn how to perform key tasks such as handling payroll, managing billing functions and communicating financial data.

Graduates of DeVry University's Management program with a specialization in Accounting may consider careers including, but not limited to, the following:

- Accountant
- Accounting Manager
- Administrative Assistant
- Budget Analyst
- Cost Accountant
- Environmental (Green) Accountant
- Financial Accountant
- Financial Analyst
- Financial Consultant
- Financial Planner
- Financial Reporting Analyst
- Forensic Accountant/Fraud Investigator
- General Accountant (Government & Non-Profit Organizations)
- General Ledger Accountant
- Internal Auditor
- Payroll Manager
- Staff Accountant
- Tax Accountant

'Employment in some occupations may require years of relevant experience.

Credits and degrees earned from this institution do not automatically qualify the holder to participate in professional licensing exams to practice certain professions. Persons interested in practicing a regulated profession must contact the appropriate state agency for their field of interest. For instance, typically 150 credit hours of education are required to meet state regulatory agency education requirements for CPA licensure.

DeVry's bachelor's degree program in Accounting includes elements of Becker Professional Education's industry-leading CPA Exam prep built right into the coursework, so you'll gain exposure to today's most relevant accounting principles.
