DeVry University's Website Development certificate program is designed to prepare graduates to develop the user experience (UX) for responsive, interactive and data-driven websites by writing web-based code that adds interactivity, responsive design, navigation, databases and multimedia elements to websites. The curriculum is designed with concepts from the Adobe Certification Exam built in to help students prepare to take the Adobe Certified Associate (ACA) Exam, which is recognized as an industry standard of achievement.

Working in a variety of industries such as advertising, marketing, technical communications, publishing and training, website developers author code and use software applications to produce visual solutions for communications, especially for the Internet, including web graphics, web animations, web videos and infographics. They also test website functionality and accessibility, fix bugs and optimize website performance.

Graduates of DeVry University's Website Development certificate program may consider careers including, but not limited to, the following:

- Graphic Designer
- Multimedia Artist/Animator
- Web Designer
- Web Developer
- Website Editor
- Website Producer

Through our TechPath approach, we’ve put technology at the core of our programs in business, tech and health – including this program. Every TechPath class you take revolves around a unique learning rubric developed at DeVry. We call it People-Process-Data-Devices or P2D2. You’ll gain real skills in collaboration, be able to adapt to new structures, and be comfortable working with data and a wide spectrum of tech-forward tools. P2D2 is a key component of what makes TechPath a smart, new way of getting the knowledge you need to be ready to hit the ground running in the way successful companies work today.
