

Bachelor's Degree Program **ACCOUNTING**

ABOUT THIS DEGREE PROGRAM

Accounting is the language of business, vital to understanding and communicating critical financial information, such as profits and losses, assets and liabilities, and cash flow. Earning a bachelor's degree in Accounting at DeVry University can help you develop the accounting skills needed to work in many business areas and industries, such as finance, management, entertainment, operations management or forensic accounting.

DeVry University's Bachelor's in Accounting degree program can help prepare you for the workplace by teaching you key business concepts and tactics, while sharpening your communication and interpersonal skills. Our curriculum can help you understand the core concepts of accounting, why it is so fundamental to businesses, and how using accounting can help businesses operate, perform and grow more efficiently. Our coursework includes an introduction to business and technology, as well as the study of data analysis, database management, and budgeting and forecasting.

Through our TechPath approach, we've put technology at the core of our programs in business, tech and health – including this program. Every TechPath class you take revolves around a unique learning rubric developed at DeVry. We call it People-Process-Data-Devices or P2D2. You'll gain real skills in collaboration, be able to adapt to new structures, and be comfortable working with data and a wide spectrum of tech-forward tools. P2D2 is a key component of what makes TechPath a smart, new way of getting the knowledge you need to be ready to hit the ground running in the way successful companies work today.

GENERAL EDUCATION COURSEWORK

Communication Skills

ENGL113	Composition
ENGL136	Advanced Composition

KNOWLEDGE AND SKILLS

FINANCIAL ACCOUNTING — Understand financial foundations, including asset recognition and measurement; external reporting; accounting for income taxes, pensions and other post-retirement benefits; shareholders' equity, share-based compensation and earnings per share; accounting changes and error correction; and statements of cash flow.

AUDITING — Examine the principles, practices and procedures used by public accountants for certifying corporate financial statements.

ACCOUNTING INFORMATION SYSTEMS —

Learn to design, install, operate and manage an integrated, automated accounting system, including ledgers, transaction process cycles, application controls, information security requirements and business information systems integration.

FEDERAL INCOME TAXATION — Understand business models such as sole proprietorships, s-corporations and limited-partnerships, as well as the federal taxation concepts that apply to them, including income inclusions and exclusions, property transactions, capital gains and losses, and tax credits.

CRITICAL THINKING — Use logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions or approaches to problems.

JUDGMENT AND DECISION-MAKING — Consider the relative costs and benefits of potential actions to choose the most appropriate one.
