ABOUT THIS PROGRAM

IS THIS PROGRAM FOR YOU?
If you are interested in understanding how machine learning models can help inform process improvements, then this may be the right program for you.

A PROGRAM TO FUEL YOUR FUTURE
Explore how systems are designed and ways to improve existing processes leveraging machine learning when you pursue this specialization.

Students will utilize computer design tools to create three dimensional models and explore process improvements. This includes developing, testing and training machine learning models to apply linear regression for making predictions.

CAREER OPPORTUNITIES
Graduates of DeVry’s Engineering Technology associate degree program with a specialization in Machine Learning and Design Techniques may consider, but are not limited to, the following careers:

- Electrical and Electronic Engineering Technologists and Technicians
- Engineering Prototyping and Fabrication Tech Support Specialist
- Electro-Mechanical and Mechatronics Technologists and Technicians
- Engineering CAD Technician
- Engineering Technologist and Technicians, Except Drafters, All Other
- Industrial Engineering Technologists and Technicians
- Manufacturing Engineering Technician

WHAT YOU’LL LEARN

ESSENTIALS
- Communicate methods and findings
- Collaborate in a dynamic work environment
- Solve complex problems
- Analyze numerical data
- Apply appropriate technologies

TECH CORE
- Illustrate the basics of computing and explain the value of data and troubleshooting
- Install and configure operating systems using Command Line Interface (CLI)
- Solve technical problems using an algorithmic approach and basic programming and coding methods.
- Network, secure, and deploy digital devices and sensors into the internet of things ecosystem

PROGRAM
- Design and analyze circuits ensuring proper construction, voltage and currents
- Understand the essential components of control systems designs and how to apply ladder logic to debug or maintain applications

SPECIALIZED
- Utilize data and analysis techniques to solve problems and drive decisions
- Leverage computer-aided design (CAD) software to facilitate the generation, modification and optimization of system design
- Explore and apply process improvement methodologies to evaluate and enhance the performance of systems
- Solve technical problems using an algorithmic approach and basic programming and coding methods

QUICK FACTS

64 CREDIT HOURS
minimum credit hours required for graduation

21 COURSES

ACCREDITATION MATTERS
ETAC of ABET accredits postsecondary, degree-granting programs that meet their global standards for technical education. This is a global mark of quality that is respected by employers and professional associations within the Engineering Technology field. The Associate in Engineering Technology degree program is accredited by The Engineering Technology Accreditation Commission of ABET (ETAC of ABET) www.abet.org.

CERTIFICATION EXAM ALIGNED CURRICULUM
Experience elements of our technology curriculum focused on real-world industry standards and prepare for certification opportunities to help validate your knowledge and skills, such as:
- CompTIA Linux+
- CompTIA A+
- CompTIA ITF+
- PCEP Certified Entry-Level Python Programmer

MINIMUM COMPLETION TIME* 1 year 4 months
OR
NORMAL COMPLETION TIME** 2 years

ACCELERATE ON YOUR SCHEDULE
Choose the schedule that best fits your goals and commitments. You can earn your Associate Degree in as little as 1 year 4 months.

* Minimum completion time does not include breaks and assumes 3 semesters of year-round, full-time enrollment in 15-17 credit hours a semester per 12-month period.
** Normal completion time includes breaks and assumes 2 semesters of enrollment in 15-17 credit hours per semester per 12-month period.
**Associate Degree Program | Tech - Engineering Technology**

**Engineering Technology - Machine Learning and Design Techniques**

**SPECIALIZED | 10 CREDIT HOURS**

**MACHINE LEARNING AND DESIGN TECHNIQUES | TECH221 Data-Driven Decision-Making**

**Two of:**

- ECT313 Generative Design
- TECH231 Introduction to Artificial Intelligence Applications
- TECH310 Process Improvement

**PROGRAM | 16 CREDIT HOURS**

**PROGRAM FOCUS |**

- ECT226 Electronic Device and System Foundations
- ECT286 Automation and Controls

**Three of:**

- ECT308 Introduction to Computer Aided Design
- ECT313 Generative Design
- ECT315 Industrial IoT
- ECT320 Manufacturing Processes and Systems
- ECT325 Electromechanical Systems
- NETW191 Fundamentals of Information Technology and Networking
- NETW212 Introduction to Cloud Computing
- SEC285 Fundamentals of Information System Security
- TECH301 Design of Experiments

*Students choosing to complete ECT313 within the Machine Learning and Design Techniques Option must take ECT308.

**CAREER PREPARATION |**

- ECT226 Electronic Device and System Foundations
- ECT286 Automation and Controls

**BE AN ACTIVE PART OF AN INCLUSIVE FUTURE**

Customize your curriculum by choosing Diversity, Equity and Inclusion (DE&I) course alternates for your Communication Skills, Humanities and Social Science courses. These course options – denoted by this icon @ – highlight relevant topics to help empower you to promote an inclusive workplace.

**HOW DO CREDENTIALS STACK?**

This Associate in Engineering Technology with a specialization in Machine Learning and Design Techniques can serve as a steppingstone to our Engineering Technology bachelor’s degree. If you choose to continue on with your education, all credits apply to this credential. Build your confidence – and your resume – when you start your journey at DeVry.*

*The figures displayed represent the minimum credit hours required for graduation. Additional coursework may be necessary to complete program requirements. At the time of application to the next credential level, an evaluation of qualifying credits will occur and the most beneficial outcome will be applied. Future programmatic changes could impact the application of credits to a future program. Refer to the academic catalog for details.

**Earn a credential at every step.**

**ASSOCIATE | 64 CREDIT HOURS**

**BACHELOR’S | +62 CREDIT HOURS REMAINING**

**TOTAL | 126 CREDIT HOURS**
