As the healthcare system strives to provide more efficient and effective care, electronic recording and access to patient information has become a major industry goal.

Our curriculum is based on current associate degree entry-level competencies outlined by the American Health Information Management Association (AHIMA). You can learn how to capture digital health information using current coding and chart management software, in addition to having the opportunity to get hands-on, real world experience during two practicums.

Through our TechPath approach, we’ve put technology at the core of our programs in business, tech and health – including this program. Every TechPath class you take revolves around a unique learning rubric developed at DeVry. We call it People-Process-Data-Devices or P2D2. You’ll gain real skills in collaboration, be able to adapt to new structures, and be comfortable working with data and a wide spectrum of tech-forward tools. P2D2 is a key component of what makes TechPath a smart, new way of getting the knowledge you need to be ready to hit the ground running in the way successful companies work today.

CAREERS IN HEALTH INFORMATION TECHNOLOGY

In addition to making sure that medical records are complete and accurate, health information technicians must ensure that all records are maintained in accordance with the law. Technical knowledge of health and systems must be combined with data entry and retrieval, admission and discharge functions, and the ability to process and prepare necessary insurance and audit forms.

With an associate degree in Health Information Technology from DeVry University, you can have not only the procedural and regulatory knowledge, but also a strong technical background. By acquiring this knowledge, you can be prepared to modify and recommend medical records technology solutions in your area of employment.

Graduates of DeVry University's associate in Health Information Technology degree program may consider careers including, but not limited to, the following:

- Medical Coder/Biller
- Medical Coding Specialist
- Medical Records and Health Information Technician
- Medical Records Analyst
- Medical Records Supervisor

3Employment in this occupation may require years of relevant experience.
