

Bachelor's Degree Program

# MULTIMEDIA DESIGN & DEVELOPMENT

Specialization: **Web Design and Development**

## ABOUT THIS DEGREE PROGRAM

The way we consume information and entertainment is constantly changing. Electronic media interact with traditional media like television and print, to provide richer and more customized user experiences. Streaming videos, apps, games and social networks deliver content in unique ways based on how, when and where we interact with them. A bachelor's degree in Multimedia Design and Development from DeVry University can help you understand both the technical and the creative aspects of content creation and delivery in the digital age.

Our Multimedia Design and Development degree program allows you to select a specialization that will focus your education on your specific goals.

**Specializations offered within the Multimedia Design and Development degree program:**

- Graphic and Multimedia Design
- Web Design and Development

Through our TechPath approach, we've put technology at the core of our programs in business, tech and health – including this program. Every TechPath class you take revolves around a unique learning rubric developed at DeVry. We call it People-Process-Data-Devices or P2D2. You'll gain real skills in collaboration, be able to adapt to new structures, and be comfortable working with data and a wide spectrum of tech-forward tools. P2D2 is a key component of what makes TechPath a smart, new way of getting the knowledge you need to be ready to hit the ground running in the way successful companies work today.

# SPECIALIZATION: WEB DESIGN AND DEVELOPMENT

## ABOUT THIS SPECIALIZATION

DeVry University's bachelor's degree in Multimedia Design and Development can provide you with a solid foundation in design functionality and digital creation. Our specialization in Web Design and Development can further prepare you to reach your individual goals.

Websites offer a variety of experiences, from the functional (such as information gathering and purchasing) to the purely entertaining. But regardless of their purpose, web users want many of the same features: ease of navigation, intuitive action and an attractive interface. Web designers and developers take into account both the visual experience of the website and the back-end coding and databases that drive it.

With a specialization in Web Design and Development from DeVry University, you can learn to design responsive and data-driven websites, the user interface, web animation and infographics. In addition, writing code to incorporate data media and interactivity to websites and web applications is also taught. Also within this program, you can learn the latest programming languages, including HTML5, CSS3, PHP and JavaScript; understand how content affects design; and integrate multimedia aspects, including video, sound, animation and text into a seamless web experience.

Graduates of DeVry University's Multimedia Design and Development degree program with a specialization in Web Design and Development may consider careers including, but not limited to, the following:

- Multimedia Developer
- Website Editor
- Web Developer
- Website Producer
- Web/Graphic Designer
