Notes:
- Reporting periods are calendar years.
- Attendance is based on students' enrollment status during their first semester for each reporting period.
- Retention rates are calculated as the percentage of students enrolled in the same program/specialization at year end and did not graduate.
- Graduation rates are based on tracking student cohorts through 150% of normal time for program completion. Students are counted only if their first degree-seeking enrollment at the student level/institution occurred in a reported program/specialization. Students must complete the same program/concentration to be counted.
