Bachelor's Degree Program

TECHNICAL MANAGEMENT

Specialization: Information Technology

ABOUT THIS DEGREE PROGRAM

For those with prior college education or professional experience, the bachelor's degree completion program in Technical Management at DeVry University can help you develop the management skills needed to work in many business areas and industries, such as accounting, project management, entrepreneurship, marketing, and human resources. With previously earned qualifying college credits, you may be able to earn your bachelor's degree in less time.

Our Technical Management degree program is designed to prepare students to meet the challenges of a high-tech, global marketplace by bringing the real world into the classroom. Through experiential projects, you can develop the skills and business acumen needed in today's business world.

If you have prior work or educational experience, you may also want to consider our Management degree program, which is available with many of the same specializations.

Through our TechPath approach, we've put technology at the core of our programs in business, tech and health – including this program. Every TechPath class you take revolves around a unique learning rubric developed at DeVry. We call it People-Process-Data-Devices or P2D2. You'll gain real skills in collaboration, be able to adapt to new structures, and be comfortable working with data and a wide spectrum of tech-forward tools. P2D2 is a key component of what makes TechPath a smart, new way of getting the knowledge you need to be ready to hit the ground running in the way successful companies work today.

GENERAL EDUCATION COURSEWORK

Communication Skills
ENGL112 Composition
ENGL135 Advanced Composition

Humanities
ETHC445 Principles of Ethics
LAS432 Technology, Society and Culture

Social Sciences
ECON312 Principles of Economics
SOCI185 Culture and Society

Mathematics and Natural Sciences

Programs, course requirements and availability vary by location. Some courses may be available online only. All students enrolled in site-based programs will be required to take some coursework online and, for some programs and locations, a substantial portion of the program may be required to be completed online. DeVry’s academic catalog, available via devry.edu/catalogs, contains the most current and detailed program information, including admission, progression and graduation requirements. Information contained herein is effective as of date of publishing.
Bachelor's Degree Program | Technical Management

SPECIALIZATION: INFORMATION TECHNOLOGY

ABOUT THIS SPECIALIZATION

DeVry University's bachelor's degree program in Technical Management can help prepare you for the workplace with a solid business foundation. Our specialization in Information Technology can further focus your studies.

The dynamic world of information technology (IT) connects people, process, data and devices, across offices and around the globe. Our Information Technology specialization introduces you to many aspects of the digital mesh that supports modern business and fuels the consumer marketplace. From cloud computing and big data storage to mobile applications and computing networks, you can explore technical solutions to address organizational problems. You can discover how to plan and manage IT infrastructure, and how to apply cybersecurity measures to protect systems from vulnerabilities.

You can also learn the networking and IT skills to help prepare you for the Cisco Certified Networking Associate (CCNA) and the Cisco Certified Entry Networking Technician (CCENT) certifications, industry-recognized credentials which can validate your skills to hiring managers. And, as a student enrolled in our Information Technology specialization, you can take advantage of our Certification Prep courses at no tuition charge.

Graduates of DeVry University's Management program with a specialization in Information Technology may consider careers including, but not limited to, the following:

- IT Project Manager
- Entry Level IT Security and Support Specialist
- Junior Systems Administrator
- Junior Network Security Analyst

DID YOU KNOW?

DeVry University's Bachelor of Science in Technical Management program has achieved voluntary accreditation from the Accreditation Council for Business Schools and Programs (ACBSP) www.acbsp.org, demonstrating that it has met the standards of business education that promote teaching excellence.

For comprehensive consumer information, visit devry.edu/studentconsumerinfo. Important information about the education debt, earnings and completion rates of students who attended this program can be found at devry.edu/btm-ge. For additional program information, visit devry.edu/btm.

KNOWLEDGE AND SKILLS

ADMINISTRATION AND MANAGEMENT — Understand business and management principles involved in IT infrastructure, information security, cyber-security, strategic planning, resource allocation and coordination of people and resources.

DETERMINING COMPLIANCE WITH STANDARDS — Use relevant information and individual judgment to determine whether events or processes comply with laws, regulation or standards.

INFORMATION AND CYBERSECURITY FOUNDATIONS — Identify common security threats and vulnerabilities such as malware, phishing, spoofing and social engineering.

COMPUTING SKILLS — Explore operating systems, basic coding techniques and ways to use software packages to analyze business problems.

NETWORK FUNDAMENTALS — Gain working and certifiable knowledge of basic networks, routing and switching essentials, scaling networks, connecting and securing networks, and small network configuration, troubleshooting and management.
