Bachelor’s Degree Program

TECHNICAL MANAGEMENT

Specialization: Information Technology

ABOUT THIS DEGREE PROGRAM

For those with prior college education or professional experience, the bachelor’s degree completion program in Technical Management at DeVry University can help you develop the management skills needed to work in many business areas and industries, such as accounting, project management, entrepreneurship, marketing, and human resources. With previously earned qualifying college credits, you may be able to earn your bachelor’s degree in less time.

Our Technical Management degree program is designed to prepare students to meet the challenges of a high-tech, global marketplace by bringing the real world into the classroom. Through experiential projects, you can develop the skills and business acumen needed in today’s business world.

If you have prior work or educational experience, you may also want to consider our Management degree program, which is available with many of the same specializations.

Through our TechPath approach, we’ve put technology at the core of our programs in business, tech and health – including this program. Every TechPath class you take revolves around a unique learning rubric developed at DeVry. We call it People-Process-Data-Devices or P2D2. You’ll gain real skills in collaboration, be able to adapt to new structures, and be comfortable working with data and a wide spectrum of tech-forward tools. P2D2 is a key component of what makes TechPath a smart, new way of getting the knowledge you need to be ready to hit the ground running in the way successful companies work today.

DeVry University's bachelor's degree program in Technical Management can help prepare you for the workplace with a solid business foundation. Our specialization in Information Technology can further focus your studies.

The dynamic world of information technology (IT) connects people, process, data and devices, across offices and around the globe. Our Information Technology specialization introduces you to many aspects of the digital mesh that supports modern business and fuels the consumer marketplace. From cloud computing and big data storage to mobile applications and computing networks, you can explore technical solutions to address organizational problems. You can discover how to plan and manage IT infrastructure, and how to apply cybersecurity measures to protect systems from vulnerabilities.

You can also learn the networking and IT skills to help prepare you for the Cisco Certified Networking Associate (CCNA) and the Cisco Certified Entry Networking Technician (CCENT) certifications, industry-recognized credentials which can validate your skills to hiring managers. And, as a student enrolled in our Information Technology specialization, you can take advantage of our Certification Prep courses at no tuition charge.

Graduates of DeVry University's Management program with a specialization in Information Technology may consider careers including, but not limited to, the following:

- IT Project Manager
- Entry Level IT Security and Support Specialist
- Junior Systems Administrator
- Junior Network Security Analyst
